THE UNIVERSITY of EDINBURGH

Degree Progression Requirements from our International Foundation Programme

Listed below are Undergraduate degrees programmes available in the 2027/8 academic year.

A full list of degree programmes can be viewed on our online undergraduate degree finder for the current admissions cycle in progress. The exact degree programmes available in the year that you progress from one of our International Foundation Programme Pathways to undergraduate degree study may change. These will be published ahead of your progression in the 2028/9 academic year.

Whilst studying our International Foundation Programme Pathways you will receive dedicated support and guidance from our IFP support team. If there are any changes to your planned progression degree programme, your dedicated IFP support team will guide you to a suitable, closely related alternative within the subject area.

Our three different International Foundation Programme pathways provide access to different subject groups of degree. You must be taking the correct pathway for the degree you intend to progress to, and select the IFP courses required to meet the progression requirements for that degree.

There may be other requirements for progression to some Undergraduate Degrees, these are also listed below.
